

Sinclair Broadcasting is violating its use of the public airways if it requires it requires its 62 stations to preempt regular programming to show an anti Kerry piece 2 weeks before the election. This is blatantly in disregard of public interest, as well as a violation of election and communication laws. It is an example of the dangers of media consolidation.

I urge you to take immediate action with Sinclair on this matter, and certainly revoke their license if they insist on following through with this. This is your responsibility, and I and many others will be watching to see how it is handled.
